

## CV - NAME CONTACT INFO

### Profile:

I am a student of geography and geoinformatics specialising within climate, environment and hydrology combined with GIS and hydraulic modelling. Through my studies I have gained a lot of experience with project and fieldwork, in Denmark as well as in arctic and tropical climates. My dream job would lend me the opportunity to immerse myself in data while at the same time communicating results pertaining to geographical issues.

### Professional competences

#### Hydrology

- Groundwater mapping
- Creation and interpretation of geological and hydrogeological models
- Hydraulic modelling of streams in Mike11
